

ESSENTIAL Robot Products serves as a distribution partner and manufacturing representative for cutting-edge companies in robotic, safety, and automation technology. Drawing upon decades of expertise from these industry leaders, we deliver tailored solutions to alleviate the common challenges faced by Robotic and Automation integrators.

Our reliable solutions offer numerous advantages to our customers, including engineered product excellence, competitive pricing, and quick lead times. These tried-and-tested solutions effectively tackle the distinctive hurdles encountered in industrial robotics, safety, and automation.

We are dedicated to cultivating robust partnerships by providing exceptional products, solutions, and top-tier customer service. With confidence, we assure you of our ability to proficiently meet your project objectives while conserving your valuable time and resources.

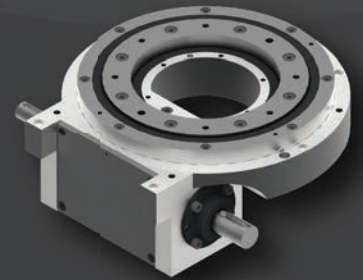

ESSENTIAL Robot Products is the representative in North America for Robot System Products, AB (RSP).

Robot System Products, AB (RSP) is a leading global provider of high-performance industrial robot accessories, offering state-of-the-art tool changers, swivels (rotary unions), hose packages, valve units, and comprehensive packages to dress robots for various applications. With over 20 years of experience, they continuously improve robot flexibility.

With over 40 years of expertise, Autorotor, S.r.l., is recognized as a pioneer in precision engineering.

Specializing in Rotary Tables, Rotary Rings, Precision Indexing Conveyors, Manipulators, and other Precision Machine Components, their dedicated team delivers unrivaled quality and customized solutions to address the specific needs of industrial automation and assembly operations.

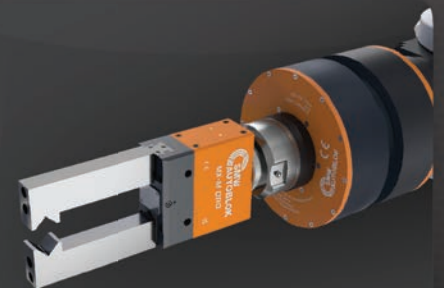

Soft-Gripping, GmbH specializes in flexible EOAT gripping solutions for high-speed handling of delicate and varying-shaped objects, ideal for logistics and food automation industries. Their lightweight, IP69K washdown, and FDA compliant actuators are well-suited for Bakery, Protein, and Produce food processing segments.

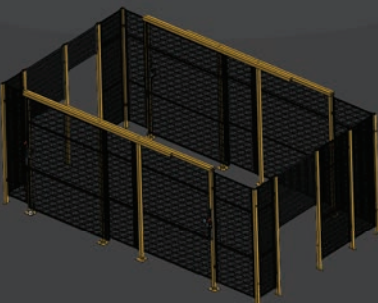

Established in 1942, SMW-Autoblok, s.p.a, and SMW Electronics, GmbH, are global leaders in mechatronics and inductive couplings. With 1,000+ employees across

60+ countries, they blend mechanical and electronic expertise to serve industrial automation, automotive, aerospace, and medical manufacturing with cutting-edge solutions. Committed to innovation, they redefine high-tech manufacturing worldwide.

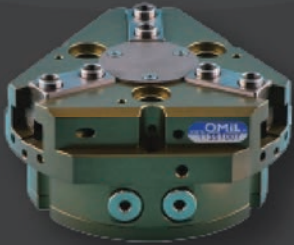

Advanced Machine Guarding Solutions takes pride in producing guards made in the USA from domestically sourced steel. With the founder's extensive 25 years of experience, they provide comprehensive safety solutions. Their preassembled posts, panels, and doors come equipped with various features such as wired interlocks, push-button clusters, light curtains, custom panels, and more, streamlining the installation process and saving valuable time. Simplify safety with AMGS-Safety Made Simple!

flexfactory
creating efficiency

Established in 1999, Flexfactory Ag. has perfected programmable bulk small parts feeders. Their anyfeed™ systems offer reliability and versatility, with a wide range of flex-feeder sizes for parts from 1 to 120 mm. Advantages include push-button quick changeovers, automatic part emptying, minimal footprint, gentle handling, and standardized communications.

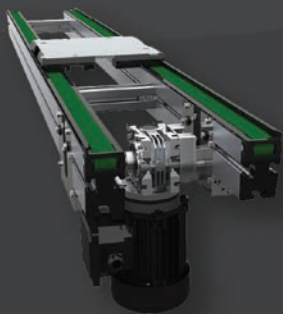

OMIL THE ART OF CLAMPING SYSTEMS

Established in 1963, OMiL specializes in manufacturing cost-effective grippers and work-holding products for automation and robotics. Their diverse range caters to industries like machine tools, assembly, and electromechanical sectors. OMiL offers long-stroke, small, and specialty gripping systems, along with clamping solutions in hydraulic or pneumatic options to meet specialized needs.

GRIP

For over 30 years, GRIP GmbH has been a leader in providing high-quality End-of-Arm-Tooling solutions for industrial robots and automation. Their products range from Manual Tool Changers and Fixture Coupling Mechanisms to Cobot Base Mounts, Specialty Grippers, and the cutting-edge Auto Connector technology. Get your GRIP on!

GLIDE-LINE

Glide-Line offers the assembly automation industry a highly versatile multi-strand panel or pallet handling solution. Their advanced configuration tool, IMPACT, allows customers to customize Glide-Line products and receive a 3D model and pricing instantly. Through their digital manufacturing process, customized configurations are built quickly and efficiently, ensuring projects meet tight deadlines. Fast, flexible, and easy!

JOULIN
vacuum handling

For more than 60 years, JOULIN has been at the forefront of vacuum handling innovation, providing standard grippers and custom plug-and-play EOAT solutions. Regardless of industry or task, they specialize in solutions for handling complete layers, partial layers, or single parts tailored to any application. Trust JOULIN to be your expert in vacuum gripping.

SSP
Safety System Products

Safety System Products, GmbH, established in 2013 by Johann Aulila, is a globally recognized leader in pioneering safety technology. With a proven track record, SSP has garnered the confidence of more than 1,000 customers worldwide. Explore their range of TUV-certified safety solutions, such as Safety Simplifier wireless machine safety, HoldX magnetic process locks, and ZEUS enabling switches, to advance your Industry 4.0 revolution.

Global Robot Parts (GRP) focuses on providing maintenance components for ABB Industrial Robots. Holding the largest stock of ABB spare parts in Northern Europe, GRP delivers OEM quality and reliability at competitive prices. Their advanced workshops and skilled staff ensure rapid turnaround, offering ready-to-ship spare parts and cables, even for hard-to-find items, to promptly restore operations.

MACRON DYNAMICS, INC.

For over 30 years, Macron Dynamics has been providing standard, modified, and custom linear automation solutions globally. Designed and manufactured in the USA, their industrially robust long-travel actuators, linear robotics, gantry systems, and 7th axis robot transfers deliver high repeatability and quick speeds. With short lead-times for complete mechanical solutions, discover how they can support your aggressive project needs.

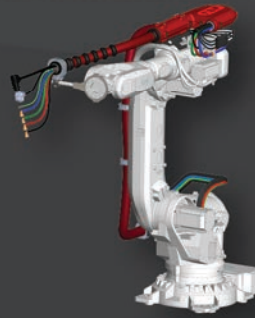

Additional Robotic Cable Management Solutions

murrplastik
Simply Smart Systems

Established in 1963 in Germany, Murrplastik has become a global innovator in cable management systems and robotic dress packs. The company's high-tech solutions enhance automation performance, reduce costs, and increase the value of clients' machines and plants. With a global presence, Murrplastik offers efficient and reliable solutions that enhance project reliability in terms of quality, safety, cost-effectiveness, and flexibility.

RS
R.S. TEKNIK

Established in 2007 as a subsidiary of Robot System Products AB, RS TEKNIK has emerged as the premier supplier of Robotic Dress and Hose Packages in China. With an extensive selection of complete J1-J3 & J3-J6 packages available for ABB, FANUC, KUKA, and other leading robot manufacturers, RS Teknik delivers durable and cost-effective robot dress solutions.

REIKU

REIKU has been a global leader in hi-tech cable protection systems for 40+ years. Their robotic cable management solutions significantly reduce or eliminate the costs of production downtime and eventual replacement of failed cables and hoses. Working closely with premier manufacturers, REIKU develops first-rate, customer-oriented system solutions.
