

**ESSENTIAL Robot Products** is a distribution partner and manufacturing representative for leading edge robotic, safety and automation technology companies. We leverage decades of experience from these state of the art organizations to deliver dependable, time proven solutions for industrial robotics, safety and automation. We are committed to forging strong partnerships through providing outstanding products, solutions and paramount customer service. We are confident that we will be able to expertly satisfy your unique project objectives in addition to saving you valuable time and resources.

**ESSENTIAL Robot Products is the sole representative in North America for Robot System Products, AB (RSP).**

RSP is the global leader in producing and developing robotic peripheral equipment for all of the notable robotic brands. RSP has a long standing tradition of producing top quality tool changers, swivels (rotary unions), swivel tool changers, tool systems, valve units, hose packages, de-burr packages and more.

**GRIP**

Grip GmbH Handhabungstechnik offers planning, design, production, testing and distribution of products in the field of handling technology with expertise in the areas of gripper technology and robot periphery.

**SoftGripping**

Soft-Gripping Produces flexible gripping solutions for high-speed Food Automation to pick a wide range of food items in the Bakery, Protein and Produce processing segments. FDA and IP69K compliant, our grippers are ready to solve the robotic automation challenges of enabling food processors to pick the hardest picking problems in the food automation industry.

**flexfactory**  
creating efficiency

Flexfactory ag is a leading developer, manufacturer and supplier of flexible, programmable feeding systems for bulk material. The highly skilled and committed team at flexfactory aims to revolutionize feeding technology and supply cost-effective solutions. The unique technology offered by flexfactory brings a whole new dimension to automatic production systems.

**Initiate your 4.0 Industrial Revolution with ESSENTIAL Robot Products' robotic, safety, collaborative robot (Cobot) and automation solutions.**

Founded in 1963, OMiL has become a benchmark name for automation and robotic components. OMiL's wide range of products support the machine tool, assembly machine, transfer machine, as well as mechanic and electromechanical industries. OMiL has an extensive offering of long-stroke, small, specialty gripping systems in addition to clamping and indexing solutions. Select from hydraulic or pneumatic options to suit your specialized needs.

Advanced Machine Guarding Solutions believes keeping your people and your equipment safe should be simple. Whether you are a custom machine builder with years of guarding experience or an end-user guarding your own manufacturing equipment, we want to help you configure the right safety guarding solutions for your application. With over 35 years experience in Automation, Robotics and Safety Guarding Solutions, Advanced Machine Guarding Solutions is your knowledgeable, reliable and local safety guarding partner.

### MACRON DYNAMICS, INC.

Macron Dynamics is a manufacturer of linear and mechanical motion components and systems. Macron Dynamics provides automation solutions for applications found throughout the US and around the world. Macron products are built with the highest quality materials, assembled in the USA and engineered to withstand the abuses of rigorous daily use.

**GLIDE-LINE™**

Glide-Line offers the most versatile multi-strand panel or pallet handling solution available for the assembly automation industry. The advanced configuration tools will enhance your design experience allowing you to configure the Glide-Line product exactly as you need. Our digital manufacturing process allows for your specific configuration to be built quickly and efficiently, allowing you to meet your project's tight deadlines.

For more than 60 years, JOULIN, a family-owned business, has been constantly innovating in vacuum handling. Whether you are picking a complete layer, partial layer or single part, the JOULIN foam gripper automatically senses and closes the check valves in areas without product, allowing the same gripper to be used with no additional set up or re-programming. From grippers to complete turn-key vacuum handling systems, Joulin is flexible and offers a quick response to supply the best solution for you.

OnRobot A/S was established in June 2018 as result of the merge of three innovative End-of-Arm Tooling companies focused on collaborative robot products; Perception Robotics, OptoForce, and On Robot. OnRobot provides innovative Plug & Produce End-of-Arm Tooling that helps manufacturers take full advantage of the benefits of collaborative robots: ease of use, cost-effectiveness and safe use alongside human workers.

Safety System Products

Safety System Products, GmbH is renowned in the global market for innovative safety technology. Founded in 2013 by Johann Aulila, who previously built-up Jokab Safety International. More than 1,000 customers place their trust in the certified safety solutions from SSP. Safety System Product's latest SAFETY SIMPLIFIER™ products utilize wireless safety techniques for plug & play safety solutions.

Global Robot Parts (GRP) is an international company which specializes in supplying maintenance components for ABB Industrial Robots. Global Robot Parts has the largest stock of ABB spare parts in Northern Europe. Along with their state-of-the-art efficient workshops and professionally trained staff; Global Robot Parts offers and supplies spare parts and cables customized to suit your specific needs.

For over 40 years, REIKU has been recognized as a worldwide leader in hi-tech cable protection systems. The costs of production downtime and the eventual replacement of failed cables and hoses can be dramatically reduced or eliminated with REIKU robotic cable management system solutions. REIKU works closely with all of the premiere manufacturers to develop first-rate customer oriented system solutions.
